Test cases (2)

Test case 1792: Rapports-Imputation hours-Add imputation-Functionality

PROPERTIES

Test Case Id:	1792
Assigned To:	Nayana K G
State:	Design

STEPS

#	Action	Expected value	Attachments
1	Open Seidor intranet portal		
2	Open Imputation hours		
3	Click add imputation button	The add imputation modal should be opened	
4	Verify the Date in the add imputation modal	The selected date should be displayed	
5	Verify the username in the add imputation modal	The user's name for which the imputation added should be there	
6	Verify the creater field in the add imputation modal	The creator should be user,if the user itself created imputation for the himself	
7		The creator should be raporter if the admin create the imputation for the user	
8	Verify the category field	The category should be added according to the selected project	
9	Verify the project field functionality of + button	All the available active projects to the user should be displayed	
10	Click one of the projects listed	The clicked project should be selected	
11	Verify the sub project field functionality	When clicking + button,all the available sub projects under the selected projects should be listed	
12	Click one of the sub projects listed	The clicked sub project should be selected	
13	Verify the task field functionality	When clicking + button,all the available tasks under the selected sub projects should be listed	
14	Click one of the task listed	The clicked task should be selected	
15	Verify the discription filed functionality	The default discription of the selected task should be added	
16	verify whether we can edit the default description	The discription should be editable	
17	Verify the internal reference field	The internal field should be added	
18	Verify the dropdown functionality of situation	The situation list should be displayed	
19	Verify the click in the situation	The clicked situation should be selected	
20	Verify the hours field	The hours should be added in 00:00 format	
21	Verify the limit of hours of imputations	The maximum hours added for a day should be 23:59	
22	Verify the behaviour when more than 23:59 hrs added	There should be validation for the invalid time	

23	click save button	The imputation should be saved
24	Verify the project once added can be edited before saving imputation	The project could have been changed
25	Verify whether the imputation can be added for blocked projects	No imputation should be added for blocked projects
26	Verify whether imputation can be added on expired tasks	It should not possible to add imputation to the tasks whose date is expired
27	Verify whether other characters and symbols can be added in the SAP data fields like division	It should be add special characters for searching
28	Verify the validation message for adding more than 23:59 hours as imputation	The validation message should be proper
29	Verify user can add imputation before the starting date of the user in that company	It should not allow
30	Verify user can add imputation after the relieving date of the user in that company	It should not allow

Test cases (2)

Test case 1790: Rapports-Imputation hours -Add expense-Functionality

PROPERTIES

Test Case Id:	1790
Assigned To:	Nayana K G
State:	Design

STEPS

#	Action	Expected value	Attachments
1	Go to Seidor intranet portal		
2	Go to Rapports>imputation hours		
3	Select a date having imputation from calender		
4	Select the imputation from the table		
5	click add expense link	Expense adding window should be opened	
6	Click Select file icon to Select the image	It should be able to upload the image from the files	
7	Verify whether the detailes of the image readed by the AI are correct	If the image is the real bill,the details should be readed by AI and it should fill all the fields correctly	
8	Verify whether the uploaded image could not readed by AI	It should be possible to add the details in maual	
9	Verify the file type accepted	The file type should be jpeg, png ,jpg or pdf	
10	Verify the click in "Expense type" dropdown	The dropdown should be opened and list of expense type should be displayed	
11	click the expense type from the dropdown	The expense type should be selected	
12	Check whether the currency can be selected for all expense types except kilometer	Currency field should be enabled for	
13	Check the currency when expense type is kilometer	The currency should be user's profile currency	
14	check the currency when the expense type is others except KM	Any currency can be selected	
15	Verify the amount field	The amount field should only accept numbers	
16	Verify the maximum digits allowed in the amount field	it should be allowed maximum 7 digits	
17	Verify the amount calculated,when the expense type is KM	When the expense type is KM,the amount should be calculated according to the unit expense per KM	
18	Verify the Destination field	The destination field should accept 50 characters as the name of the place	
19	Verify the Adress field	The Address should be selected from the searched results	
20	Verify the round trip functionality	The round trip calculated the From -To-From distance	
21	Verify ADD stop button functionality	It should be possible to add intermediate stop	
22	Verify the round trip functionality, when adding intermediate stop	The round trip functionality should be disabled when adding intermediate stop	
23	Verify the functionality of "calculate km" button	It should calculate the distance in km between the	

		start- end destination
24	Verify the amount calculated after clicking "calculate km" button	The amount should be =Calculated km*Rate/km
25	Verify the file upload when the expense type is km	When expense type is km,there should not be file upload
26	Verify the file upload when the expense type is other than km	The files of type jpeg,png or jpg of size less than 5 MB is accepted
27	Verify the file upload when the expense type is other	The files of type jpeg,jpg,png or pdf of size less than 5 MB should be accepted
28	Verify the functionality of delete button	the expense should be deleted when saving the add expens modal
29	Verify whether we can add two or more tickets and Save	It should possible to add more than 2 tickets
30	Verify the maximum of kilometers afdded in the kilometer field when selecting expense type as kilometer	The max KM should be added is 99999
